---

Registration Number: 363

Name : BETTY N'tinyari  
Age : 21 years old – born 1992  
Residence : Isiolo – Barrier area  
Diagnoses : Cerebral Palsy, Spastic, Quadriplegia  
Indication : Physiotherapy, VTC

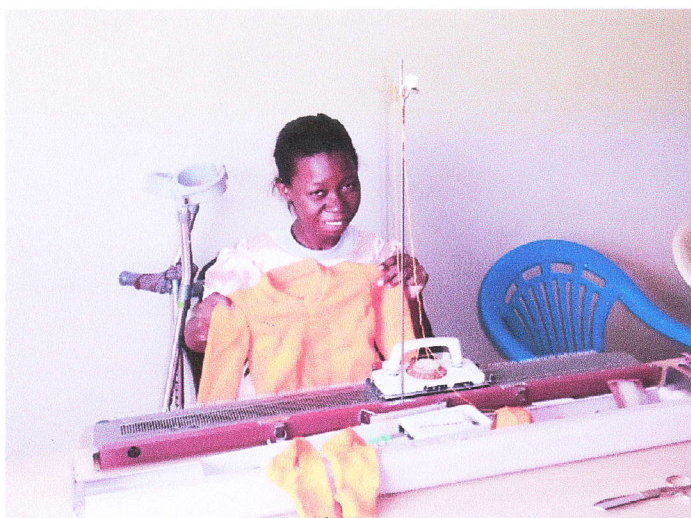

BETTY is a very quiet girl. She is shy and hardly ever laughs or speaks with the other girls.  
She is the first born child in a family of 4 children. None of the other children has a handicap. The family lives in a stone house with pipewater and a toilet.

BETTY was born in Wamba Hospital through vacuum extraction. She has had physiotherapy for many years.  
She went to school and knows how to read and write. She can speak but very slow with a few words.

**Provisional Rehabilitation Plan:**

BETTY needs constant physiotherapy due to her spasms. She will follow the Tailoring class for three years, especially knitting with the knitting machine.

The long term goal is that she is able to take care of her own sustainability through knitting with a machine.

P.S. To avoid misunderstandings (some children have the same name) please ALWAYS use the registration number.
