Registration Number: 343

Name : ESTER Wamboi

Age : almost 4 years old – born September 2009

Residence : Isiolo – Kula Mawe

Diagnoses : Mentally handicapped but not yet clear how severe; TB; hemiplegia Ri.

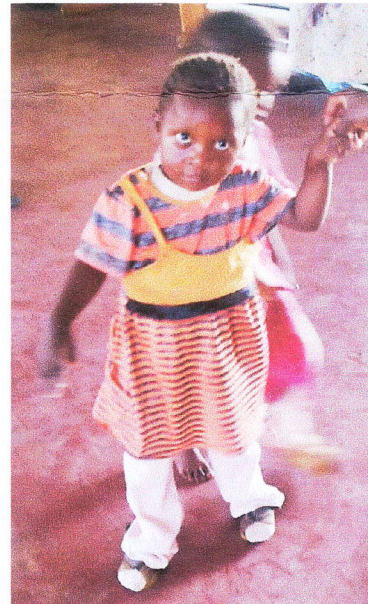

Indication : Physio- and Occupational therapy, Baby class

ESTER is the last born in a family of 7 children. Her sister Wangame looks after her. She lives in a timber house with no pipe water and a pit latrine on the premises.

In 2010, when she was 2 years old, she got Tuberculosis. ESTER went for therapy to the General Hospital. Although she completed the treatment, she is still coughing.

Her right side of the body is very weak. She crawls, but can stand with support.

**Provisional Rehabilitation Plan:**

ESTER needs physio- and occupational therapy to stimulate her senso-motoric development. She still has to learn the ADL-activities and attends the Baby Class. She is at this moment too young to be tested on her intellectual capacities.

At this moment we do not have long term goals for her.

P.S. To avoid misunderstandings (some children have the same name) please ALWAYS use the Registration Number when you contact us.
