LEILA is the fourth child in a family of 7 children. The family lives in a timber house with no water connection. They have to buy the water per container. On the premises there are several houses and they sharing a pit latrine.

As a baby and young child (till she was 5) Leila got treatment at the District Hospital of Isiolo. Now she can walk a little bit.

A big problem, both for her and for the people around her, is her behavior: she is very naughty and does not listen to any order. She does not speak except one word: "juice". Whenever she needs anything she says "juice".

ADL-activities: LEILA eat with her fingers, cannot (does not want?) to eat with spoon; has bowel- and bladder control. Cannot wash and dress on her own.

Provisional Rehabilitation Plan:

Physiotherapy to improve her senso-motoric capacity;

Baby class;

Individual attention by the Occupational Therapy, to improve her behavior.

P.S. To avoid misunderstandings (some children have the same name) please ALWAYS use the Registration Number when you contact us.
